

*Why does Piedmont Fiberglass list their pricing on our website?*

The main reason is that when I am shopping on-line I want to have an idea of how much something costs before I speak to a salesman. We try to list the most popular options on each page that includes costs. For example, the majority of our steeples are purchased with a ball and cross. So, instead of giving you a base price then adding on several options we want to give you the price with the common options.

Obviously, our friends in the business check our pricing and adjust theirs accordingly and that is fine with us. Because we know that it can be confusing when looking at several models from several sources. We want you to know what your pricing will be instead of relying on hand written notes or verbal quotes.
