Shingle Saver

What is Shingle Saver?

Shingle Saver is a 3/16" layer of fiberglass that is placed between the steeple base and the surface of the shingles.

Advantages of Shingle Saver

- Disperses the weight of the steeple over a larger area.
- Reduces the possibility of water leaks.
- Protects the shingles from the cutting effects of the steeple base due to wind loading and normal settling.

Easy to Install...
Just nail in place!
